

Environment & Occupational Health and Safety Policy

Perfektüp has formed its Environment & Occupational Health and Safety Policy to minimize and prevent possible negative effects upon employees and environment with the principle of constant optimization in aluminum and laminated tube production and support activities by:

- Complying with local and international law, regulations and other legal obligations about Environment and OHS.
- Minimizing pollution from all its industrial activities by preventing it in its source.
- Minimizing accidents and possible maladies by its activities.
- Promoting recycling and keeping a check on waste.
- Controlling risks regarding Environment & OHS and activity in general on minimizing said risks, thus creating a healthy workplace.
- Controlling natural resource and energy usage by minimizing the losses and keeping the consumption as low as possible by utilizing natural resources with minimal impact on environment.
- Constant improvement by setting goals for minimized Environmental effects and OHS.
- Raising awareness on Environmental issues as well as OHS and making these concepts internalized by organizing trainings for both our employees and our suppliers.
